

SAUD ZUBEDI

Frontend Developer · React / Next.js

+91-770-273-5203 · Saaud266@gmail.com · Hyderabad, India

SUMMARY

Frontend developer specializing in React, Next.js, and TypeScript. Founded and shipped BR Max, an iMessage-style video generation SaaS acquired by a private buyer for \$6,000, adopted by TikTok creators with 750K+ combined followers. 3+ years of freelance experience building production SaaS across fintech and healthcare.

PROJECTS

Hospital Management System | Contract Work | 2026 · Private hospital, Hyderabad

- Built and deployed a full OPD/IPD management system, actively used daily by clinical and admin staff for patient intake, admissions, and consultations
- **Tech:** Next.js and PostgreSQL, deployed locally on hospital premises
- **Features:** Doctor commission/share tracking, staff end-of-day reports, PDFme-based customizable document generation, and multi-role patient workflows

BR Max | Founder & Sole Developer | 2026 (acquired) · brmax.xyz

- Built and shipped a video generation SaaS for content creators; **acquired by a private buyer for \$7,000**
- **Tech:** Full stack: Next.js frontend, Remotion-based video composition, AWS Lambda for rendering, ElevenLabs voiceover integration
- **Shipped:** Live video preview, auto-trim of silent pauses in voiceovers, and token-based subscription billing
- **Traction:** Adopted by many huge TikTok creators including @texty.stories.daily (550K followers) and @speakingtexts (200K+ followers)

FREELANCE EXPERIENCE

Arcgen Technologies (Freelance) | Hyderabad, India · 2022-Present

Led frontend development across multiple client SaaS projects; worked in small teams of 3 to 4.

Emvive · Fintech SaaS

- Built a MERN-stack SaaS integrated with ZATCA (Saudi e-invoicing); reduced rejections via an in-system validation layer
- Migrated infrastructure from per-client EC2 + RDS instances to a shared SaaS model, **cutting monthly AWS costs from ₹30,000 to under ₹3,000**
- Built a no-code dynamic forms module, reducing form creation time from days to under an hour
- Led a frontend team through the SaaS migration and HCM module rollout

Vizzhy · Healthcare

- Developed a patient-facing healthcare app using React, Redux, and Azure AI
- Integrated automated speech recognition and a Firebase-based real-time chat system between doctors and patients

Wellyfe · Healthcare

- Built a patient-doctor portal with React, Redux, Twilio, and Recharts
- Implemented real-time video consultations (Twilio) and automated SMS reminders

SKILLS

Languages: JavaScript (ES6+), TypeScript
